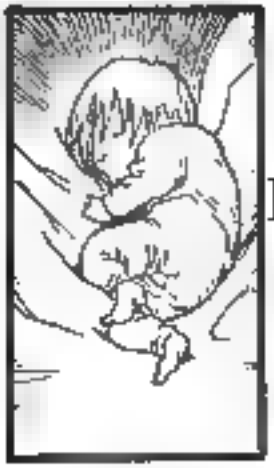
DISCOVERY AND RETRIEVAL

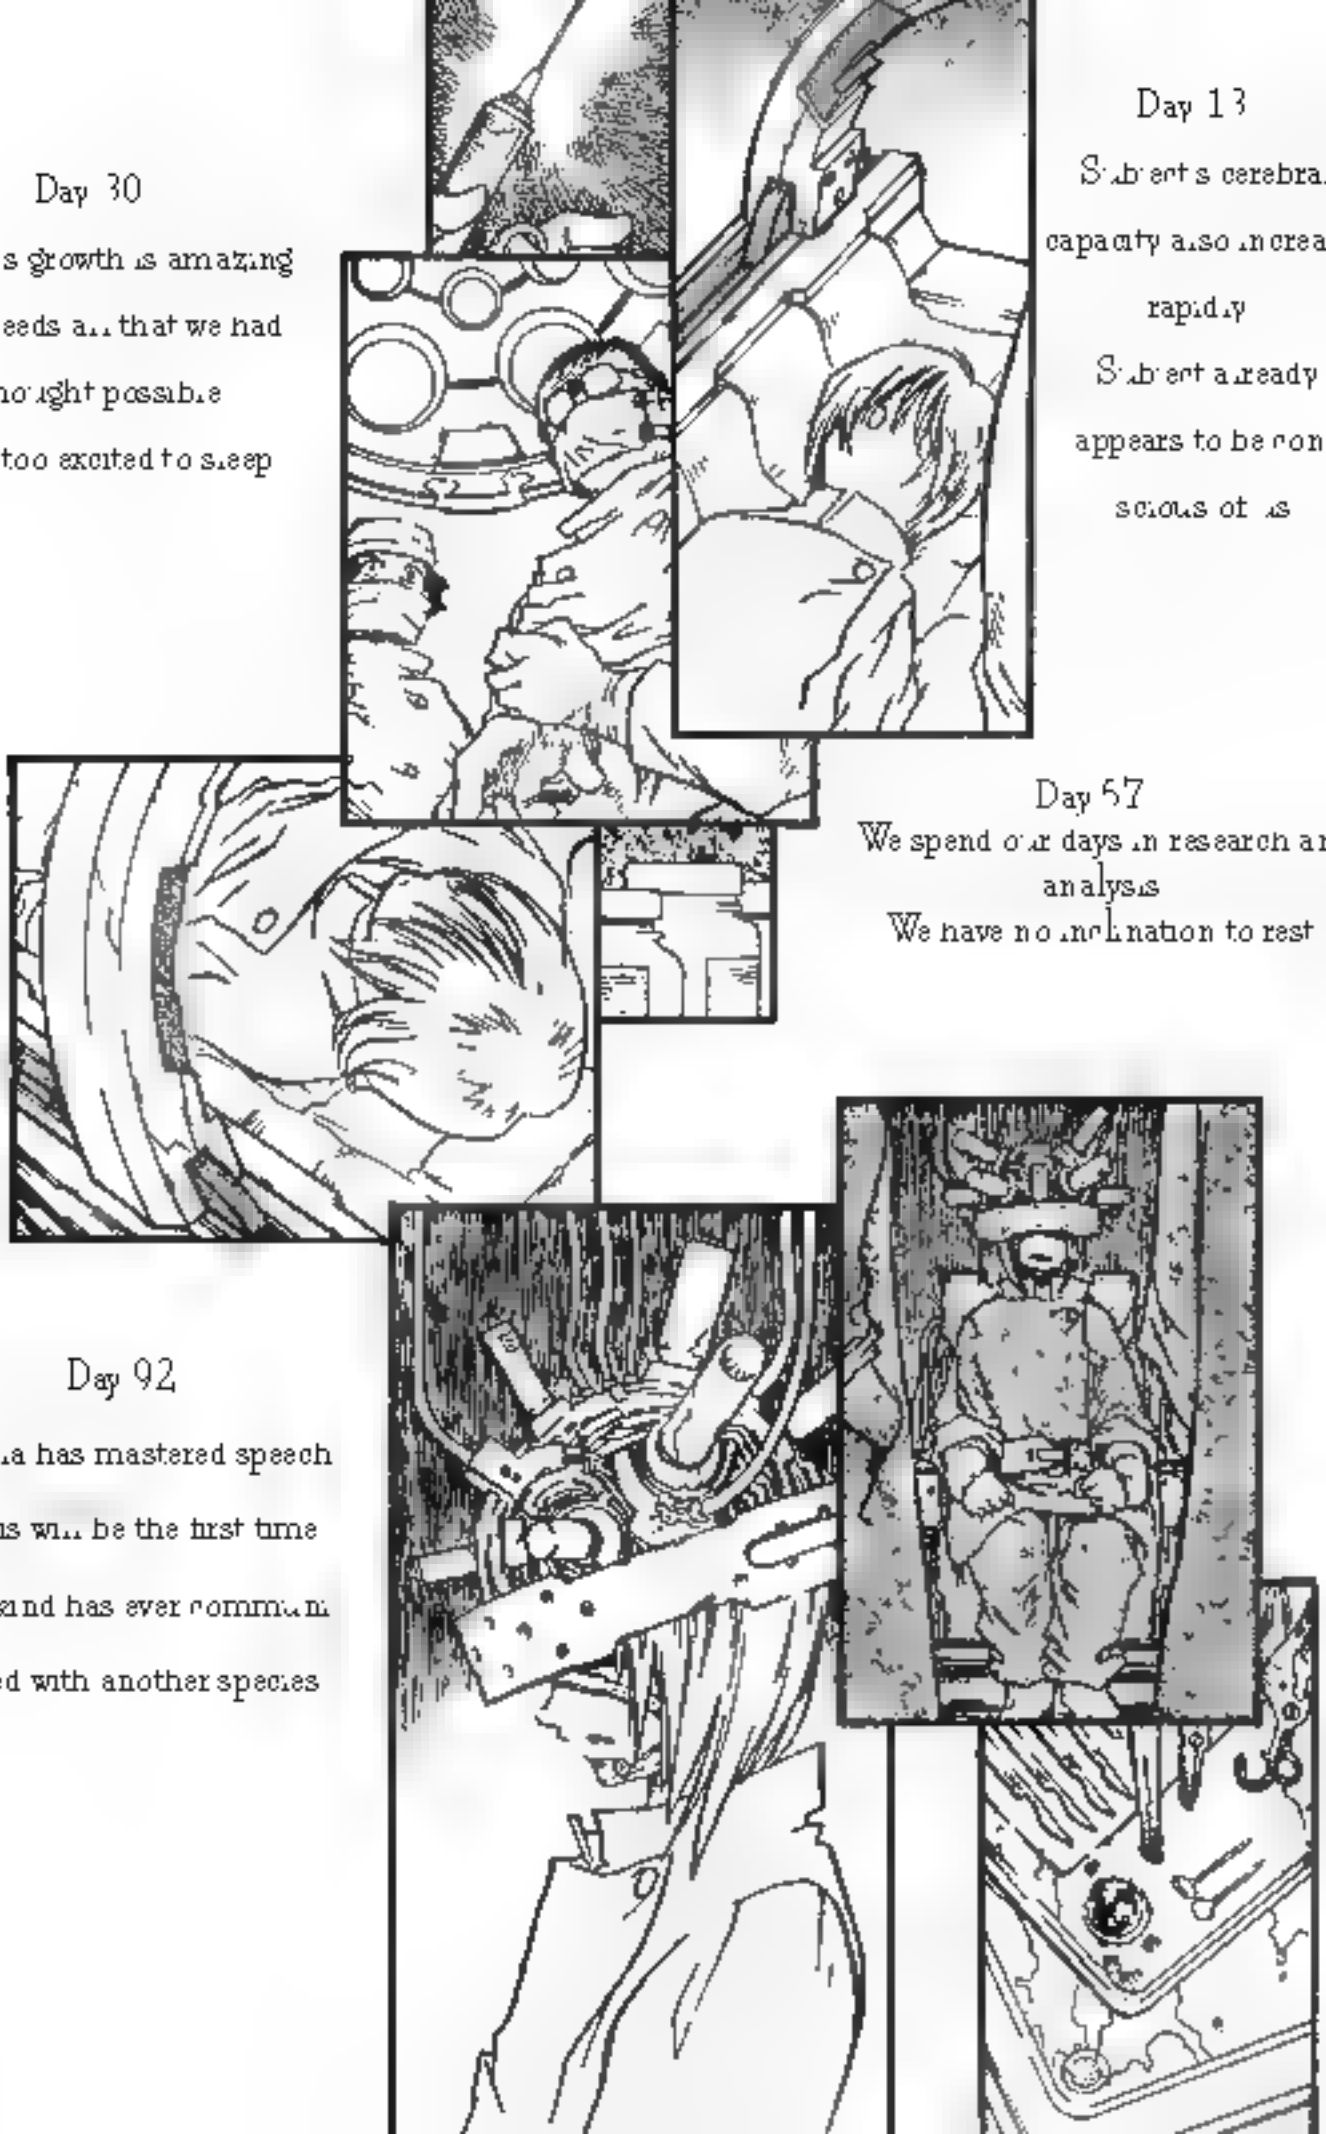
DISCOVERY AND RETRIEVAL

Subject can mature at a rapid pace, there in no time for a crew meeting

This might be a great scientific discovery for us.

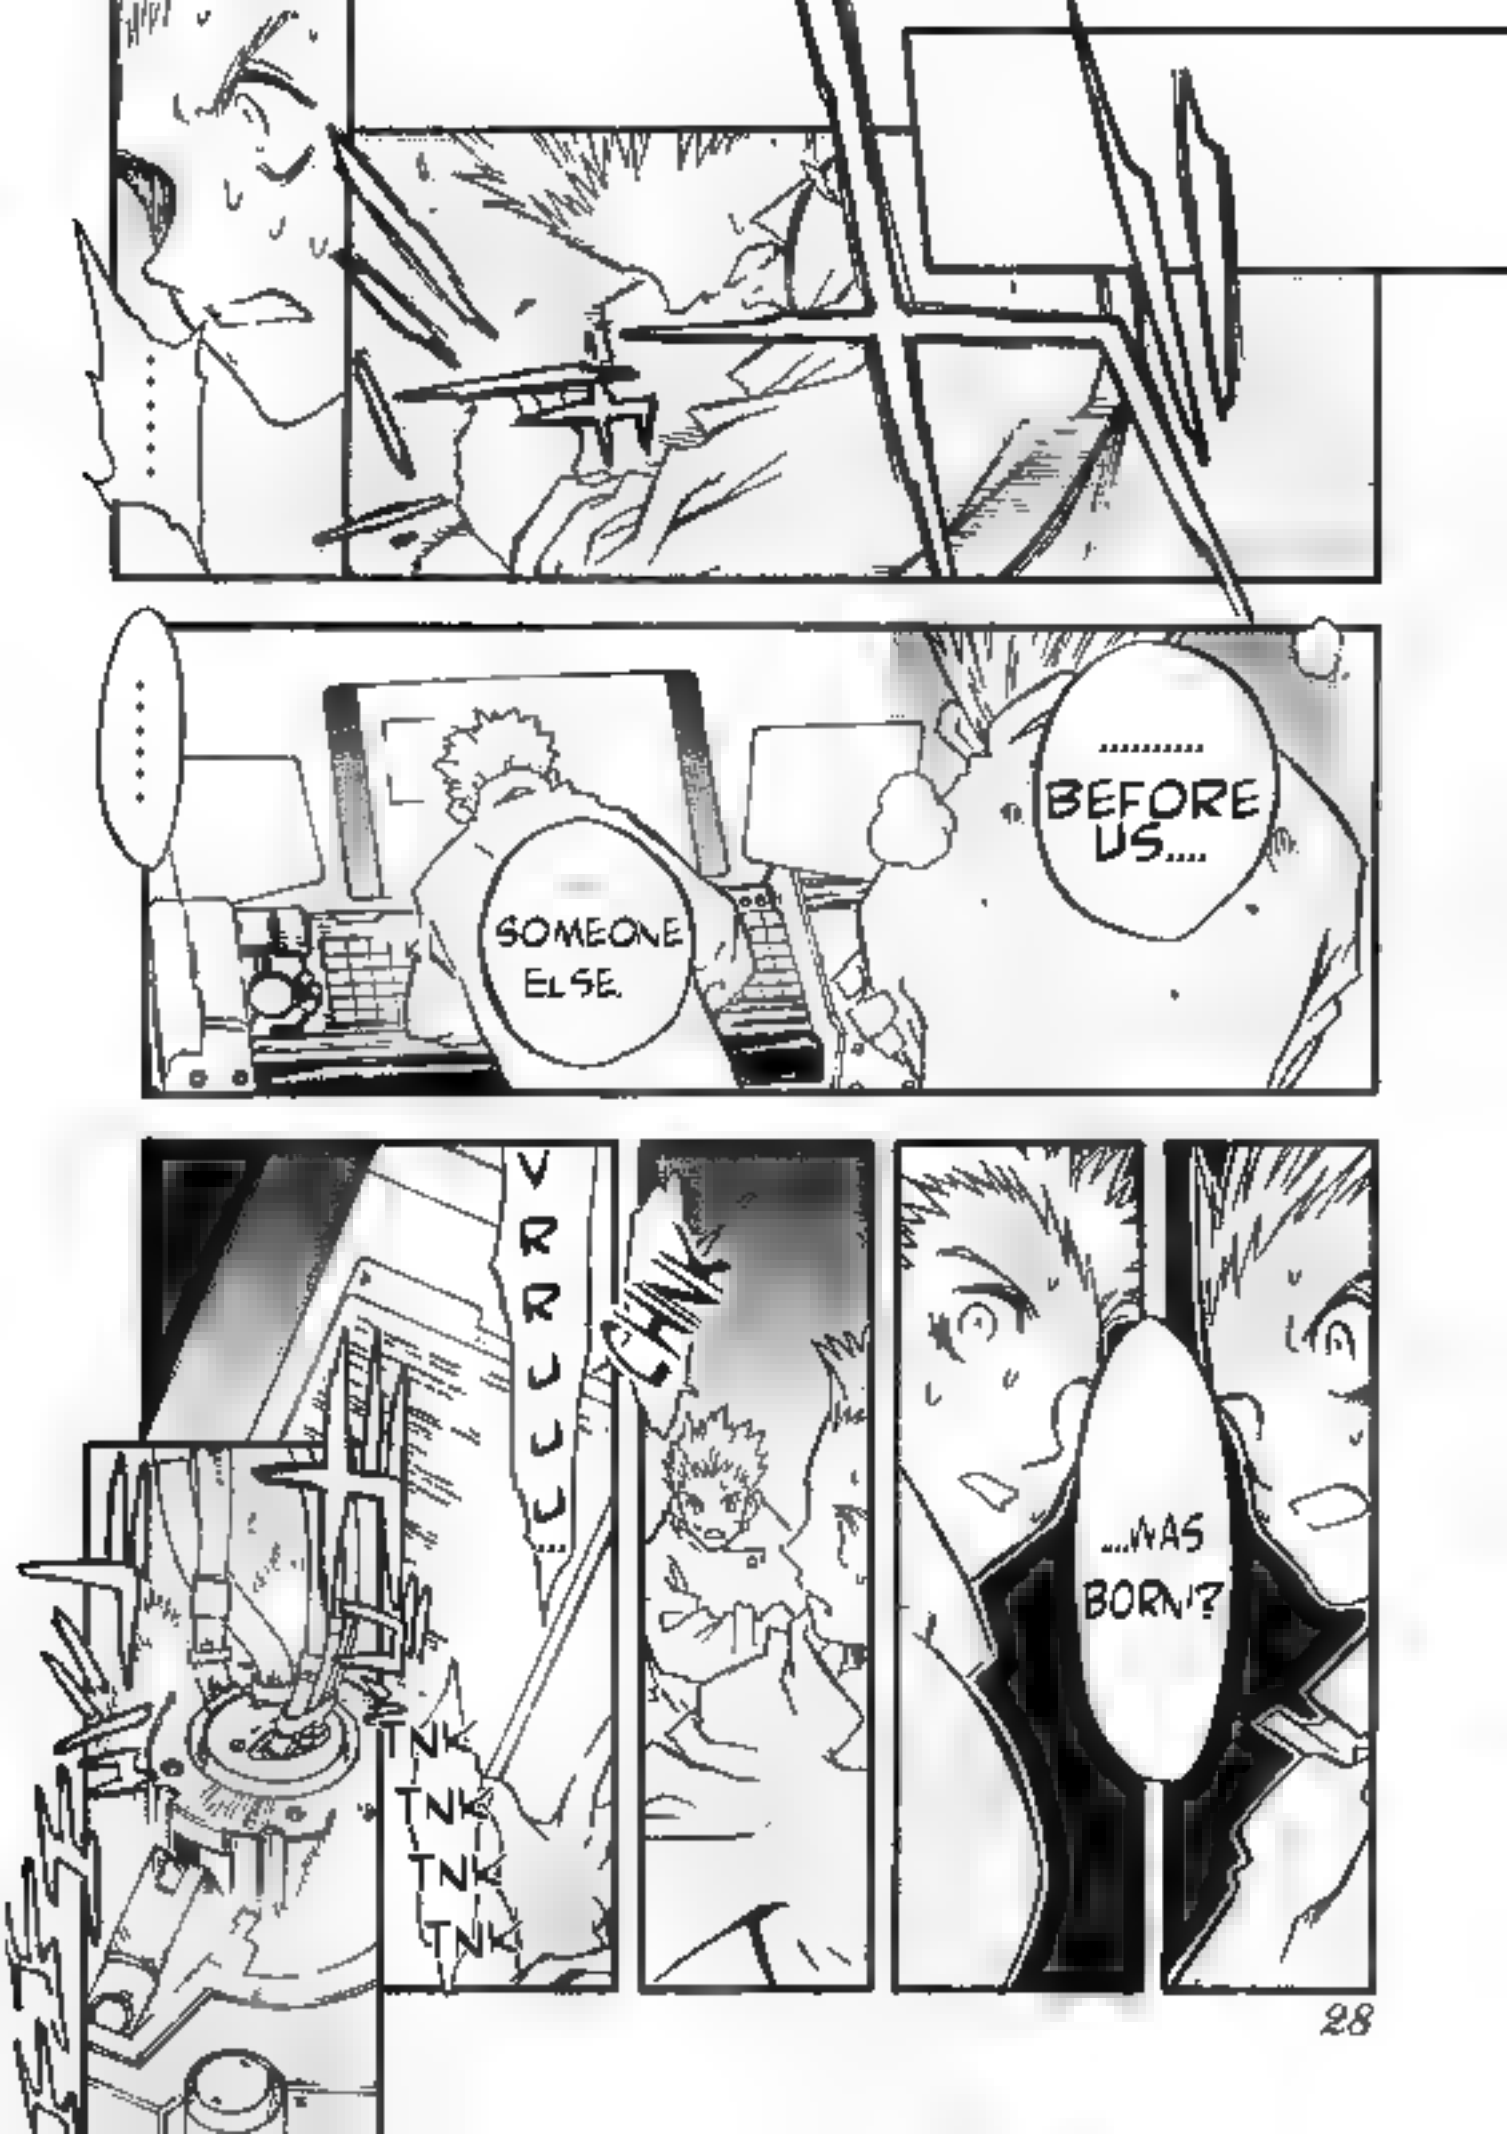


If I can speak my personal thoughts, I can't help but feel excited!!

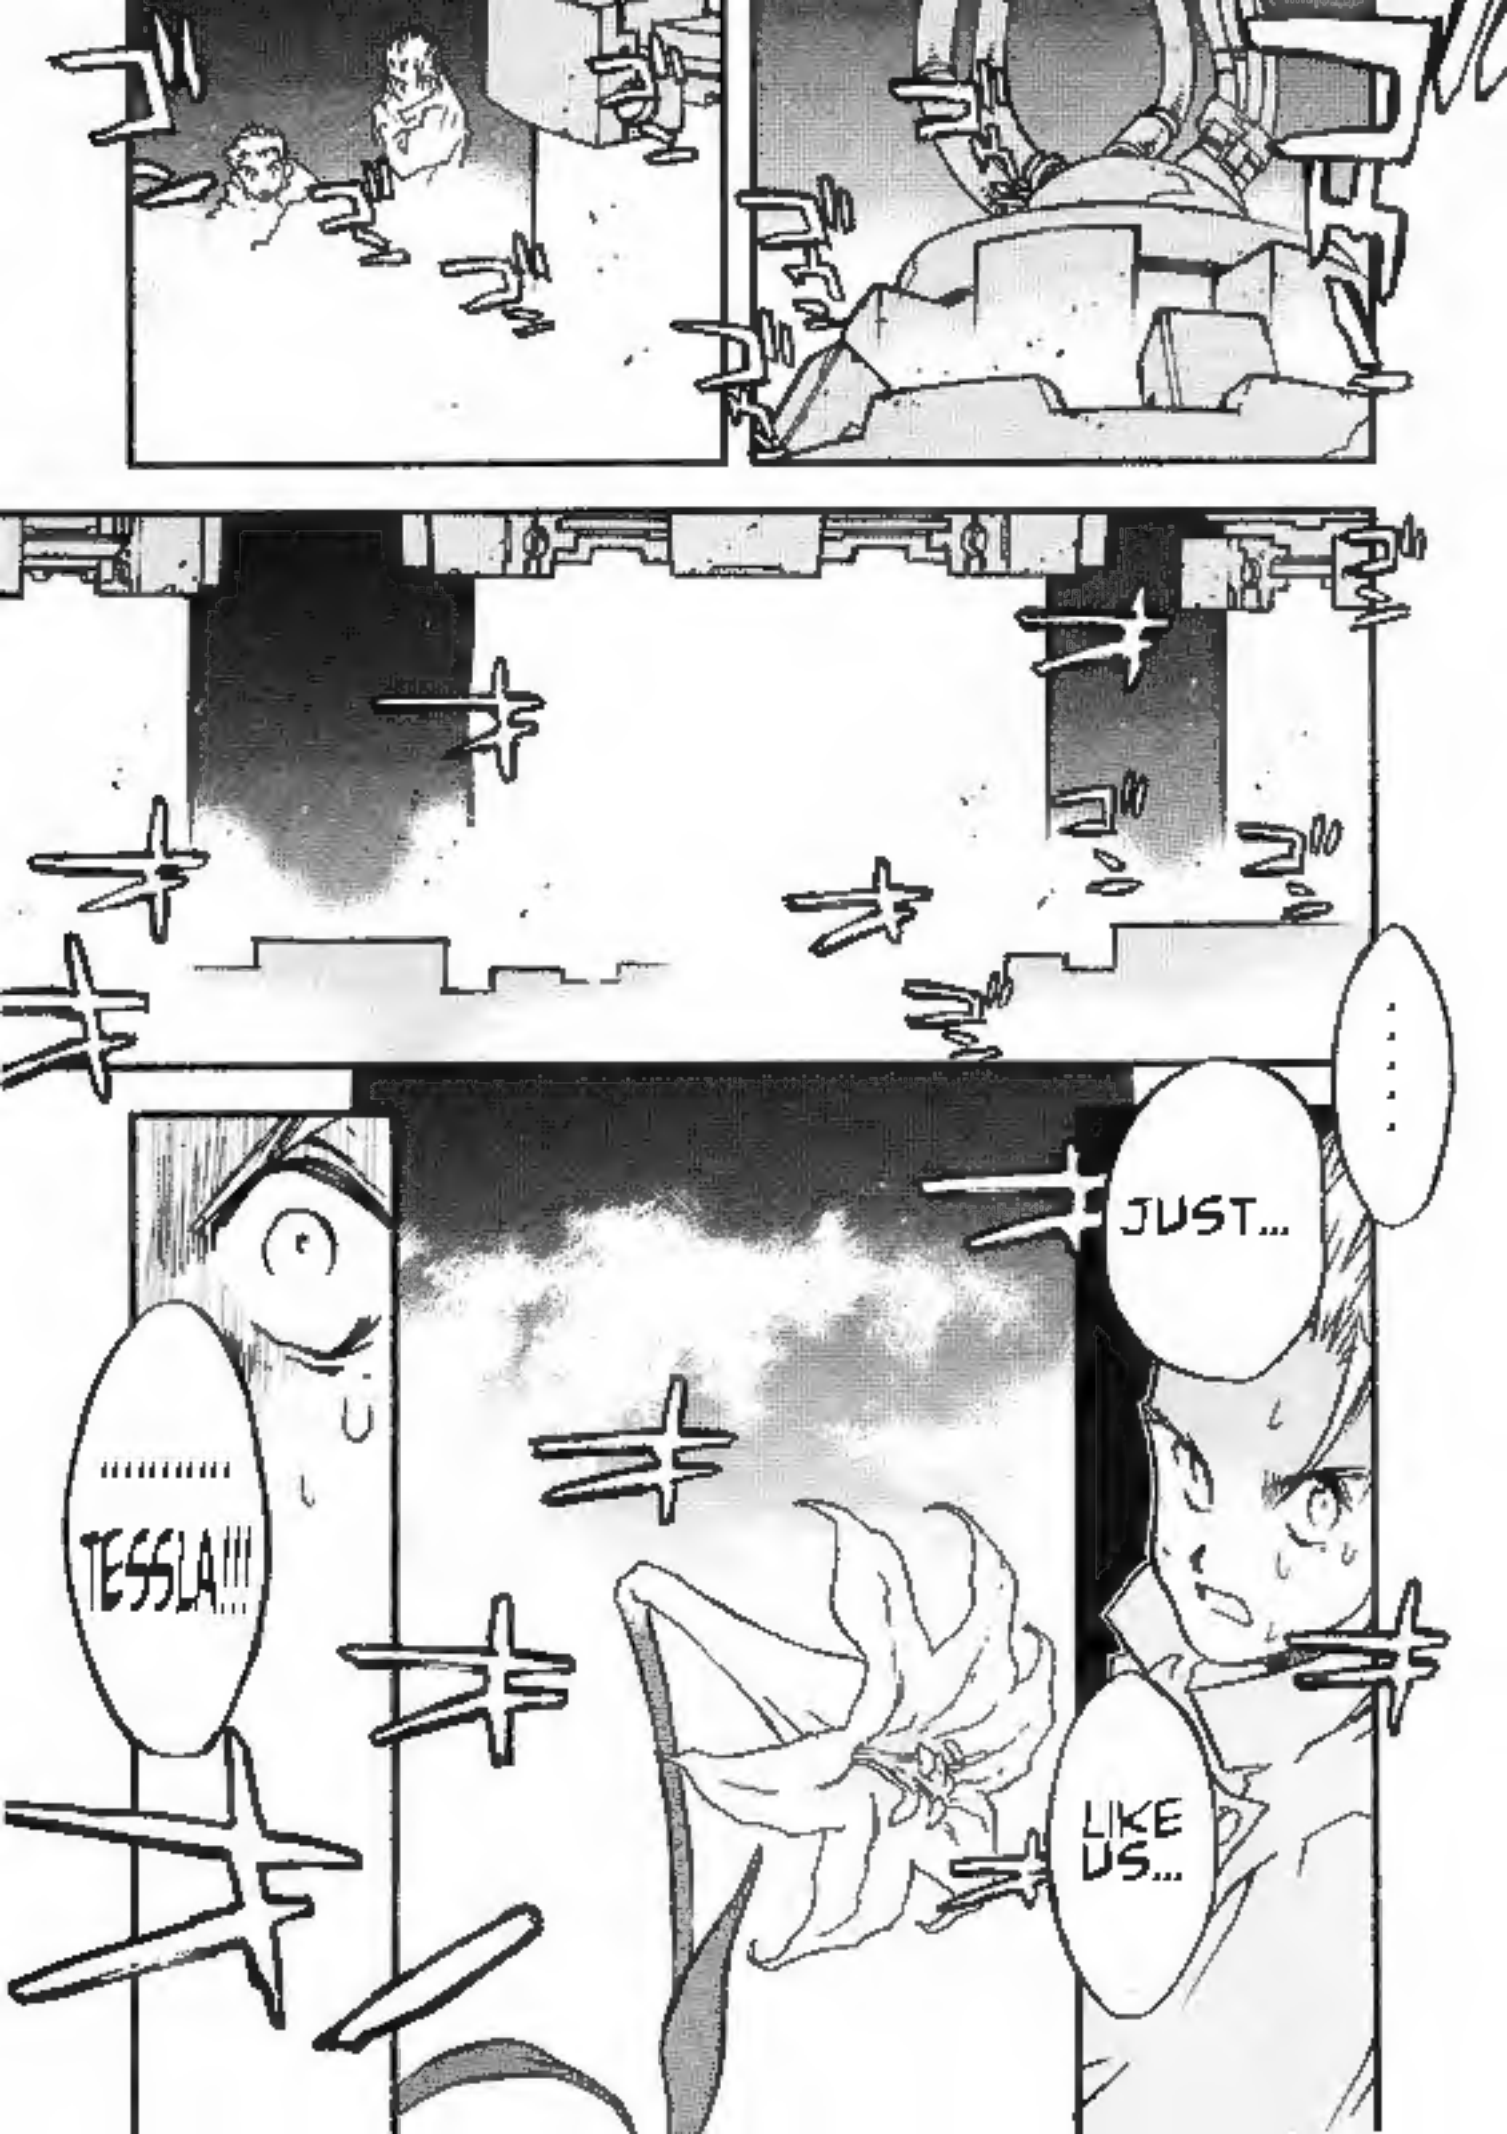


Day 30
Tessia's growth is amazing
It exceeds all that we had
thought possible
I am too excited to sleep
Day 13
Subject's cerebral
capacity also increases
rapidly
Subject already
appears to be con
scious of us
Day 57
We spend our days in research and
analysis
We have no inclination to rest
Day 92
Tessia has mastered speech
This will be the first time
mankind has ever communi
cated with another species

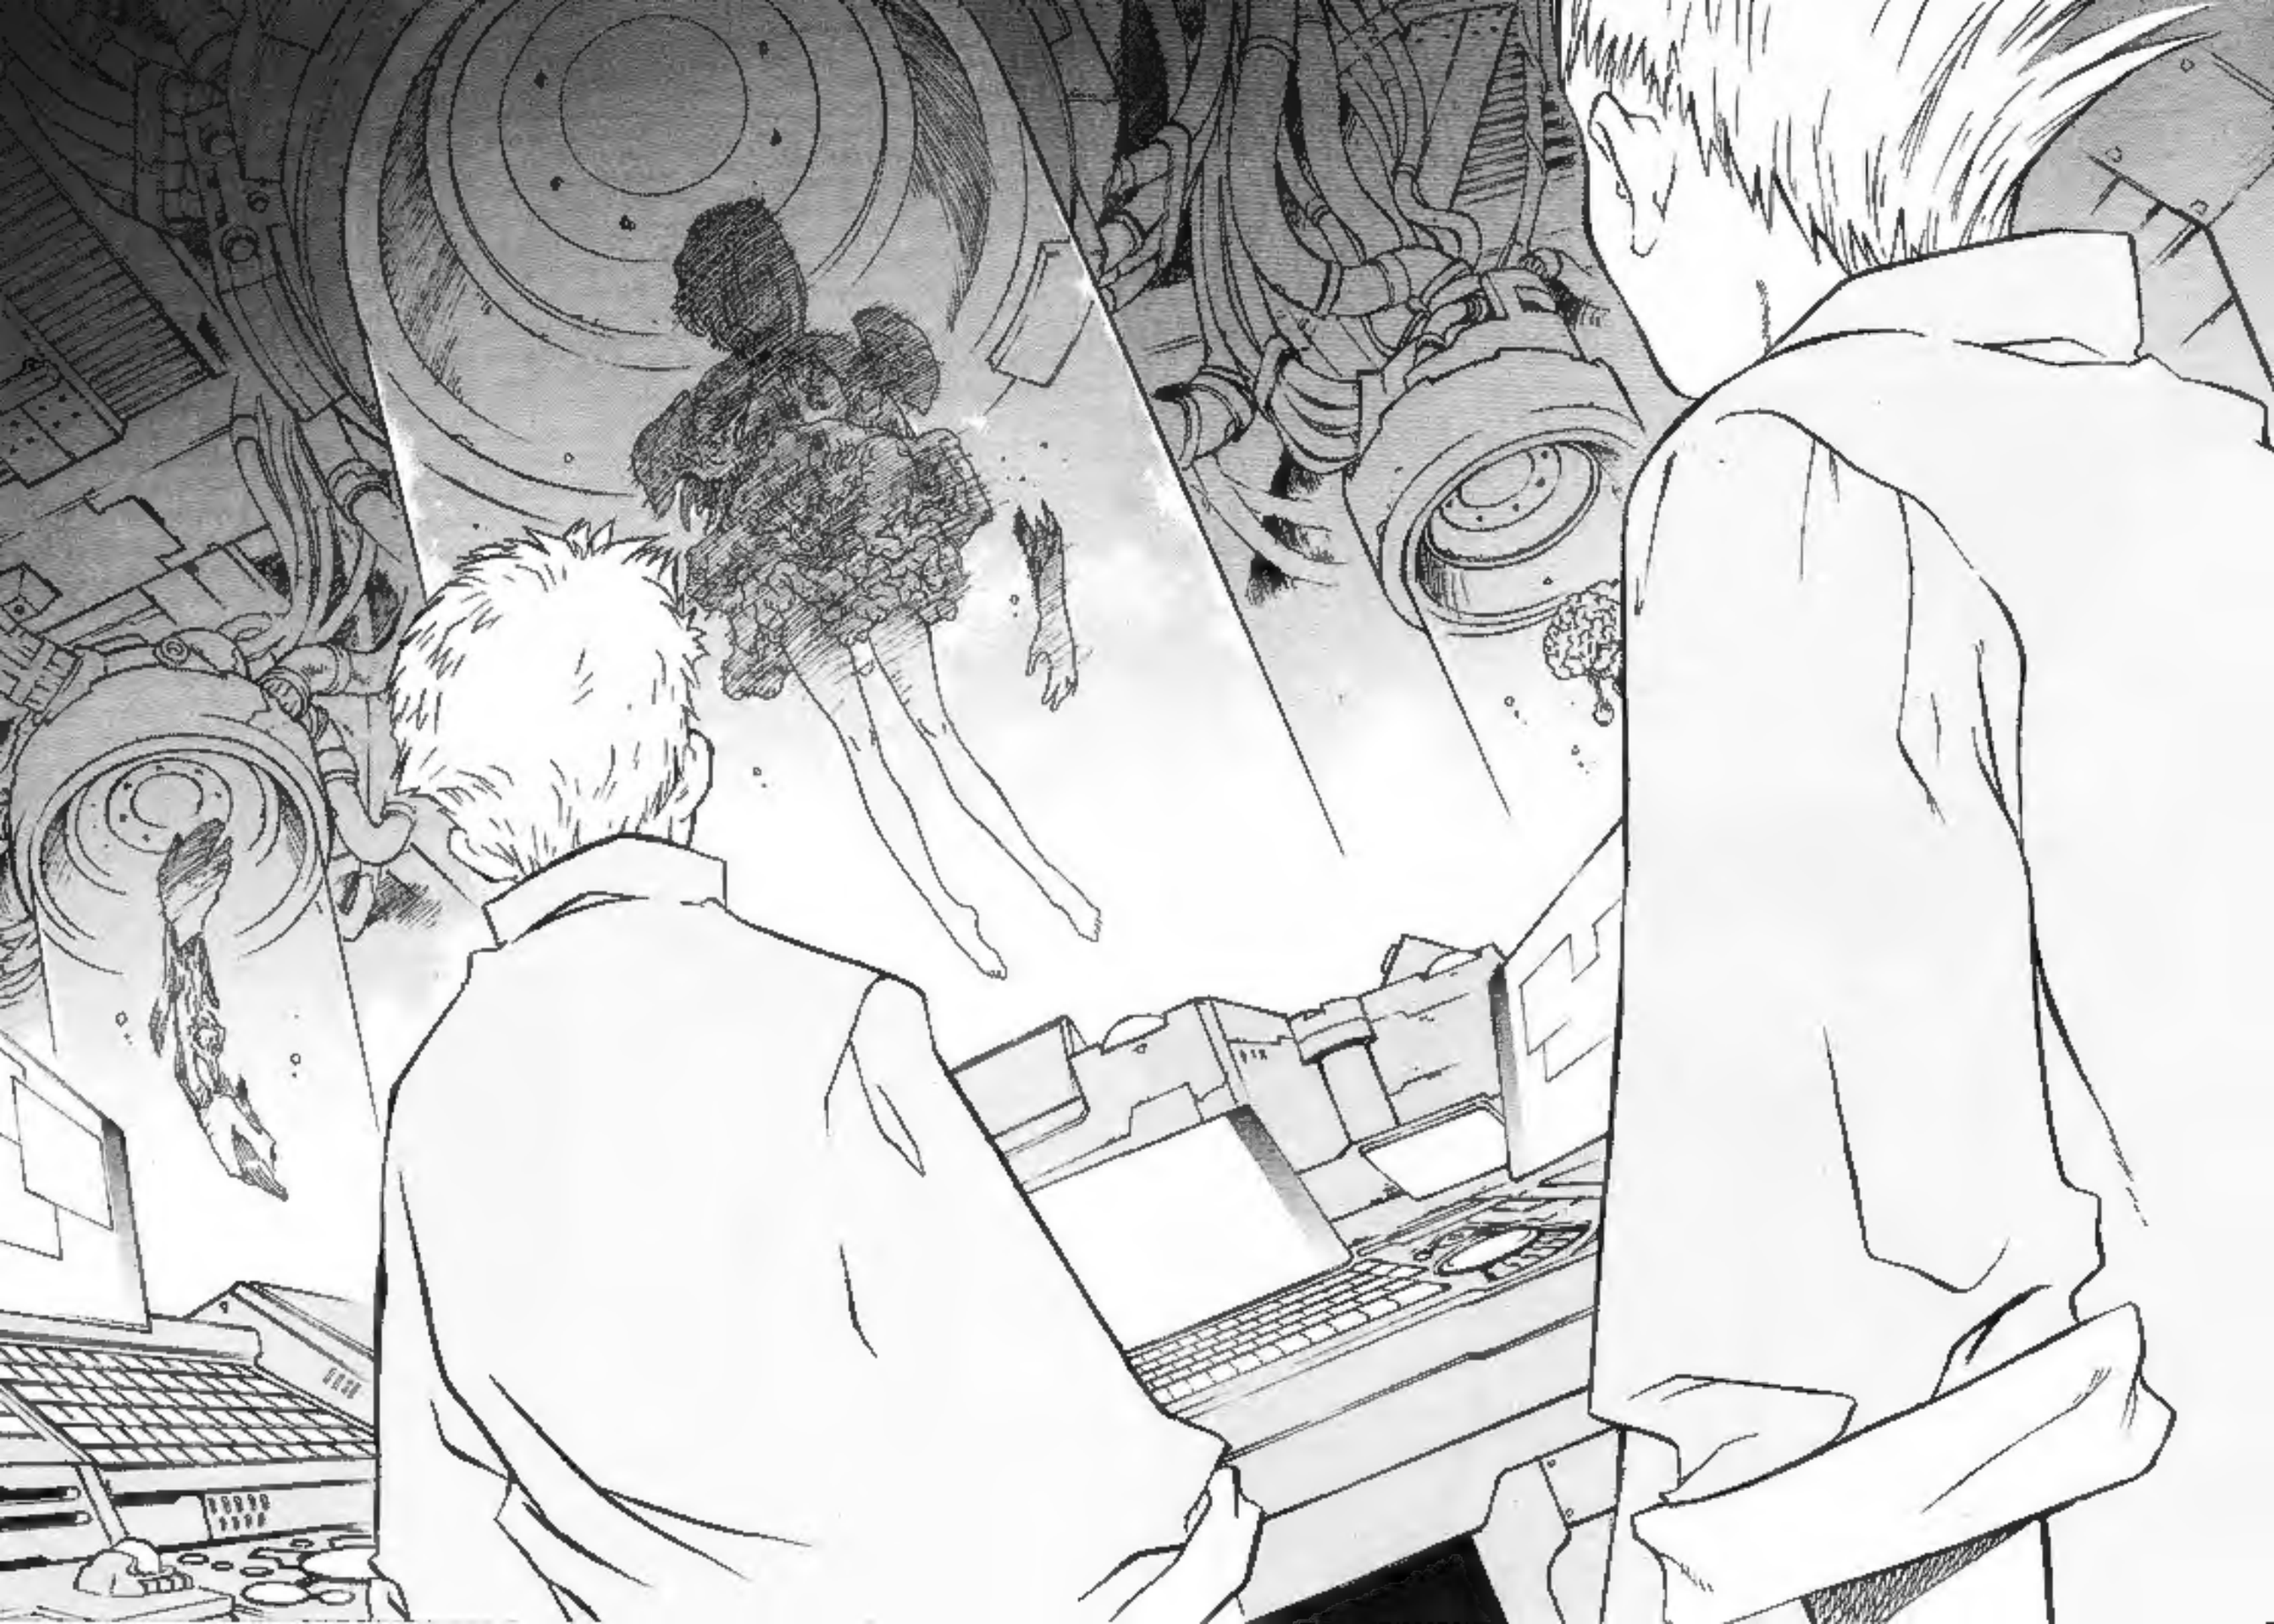
One might say this is the result of a series of chance occurrences, but this is an entirely new life form derived from a manmade creation.
I am frustrated by the limitations of the equipment on this ship.
This is a historic moment.
Day 100--Trouble over a question of ethics.
Day 110
Possibly influenced by repeated scanning tumors have been discovered in multiple locations
Commencing surgery



.....
.....
BEFORE US....
SOMEONE ELSE.
...WAS BORN!?
CHNK
VRRUUUU...
TNK
TNK
TNK
TNK



.....
JUST...
LIKE US...
.....
TESSLA!!!



Day 192--
Subject's hair loss continues unabated.
Upon getting up, fractured her thighbone.
There is a distinct odor.
Day 186--
Subject's weakness is readily apparent.
Day 170--
Confirmed sharp decline in renewal functions.
Day 229...
Subject suddenly went into convulsions during administration of medication--
Fourteen hours later, all physical functions ceased. Following completion of specimen report, project is closed.
